

COLLECTION E

MARTINSTOLL

COLLECTION E

The Collection E visitor and conference chairs are for universal application. When arranged formally, they can be integrated into the most diverse environments, permitting problem-free combinations with existing furnishings. The one-piece seat shell provides a pleasant sitting sensation, and is available in the fully-upholstered or exposed wood shell version.

All chairs are equipped with armrests, offering a choice between leather and plastic armrests. The back-friendly cantilever typically shows the pronounced curvature of the forward edge of the seat. The practical reason: no pressure is exerted above the hollow of the knee, even during long periods of sitting. The formal reason: the convex radius provides a matching counter-part to the concave curvature of the seat shell.

ANDREAS KROB - B4K

Designer Andreas Krob always combines excellent form with his quest for new techniques, materials and functions. With COLLECTION E, he has created a chair that combines creative design and good ergonomics in a single cohesive unit. The concavity of the back is reflected in the soft curves found in the front edge of the seat and gives the chair its unique appearance while at the same time improving seating comfort.

“COLLECTION E is a chair that combines creative design and good ergonomics in a single cohesive unit.”
